BACKPACKER ASSOCIATION HANDBOOK STANDARD (HB:393:2011)

Upgraded from the AS/NZS4220:2010 approved standard to the Australian Backpacker Association 'Handbook' Bunk specification HB:393:2011.

All specifications relating to and including Entrapment, Snag Points, Protrusions, Stability and Loadability meet both the AS/NZS4220:2010 and the increased HB:393:2011 requirements.

Fully tested and approved through VicLab authorized Testing Laboratory in Melbourne, Australia.

Test Reports #40706/07 and #40807/08 dated 22nd July 2014 and 12th August 2014
